Students at Lincoln Elementary School hit the "Target For Today—PTA" by attaining 100 per cent membership in eighteen rooms.

Under the capable direction of Mrs. A. C. Bongiorno, membership chairman, the school reached the highest membership in its five year history.

Mrs. Barbara Booth's fifth

grade class won the coveted trophy for the second year in a row with 221 per cent membership.

All the children in her class received an ice cream treat from the Parent Teacher Association.

As an extra added incentive this year all rooms reaching 100 per cent membership will be treated to a free movie.

Money derived from the membership drive will be used to help children in the community and bring a closer association between school, parent and child.

STL Program-Director to Speak at BFW Meet

Dr. George Gleghorn, OGO program director at TRW Space Technology Laboratories, addressed a meeting of the Torrance Business and Professional Womens Club (Orbiting Geophysical Club Monday evening, The Observatory), one of NASA's prime space exploration projects, will be the subject of Dr. Gleghorn's remarks.

Dr. Gleghorn has more than 13 years experience in missile control system design and technical management. His STL experience dates from 1954, and ranges from Pioneer I through Pioneer V and Explorer VI. OGO is known as the "streetcar satellite," because experiments can be added or subtracted at any time during assembly, in much the same way passengers get on and off a streetcar. It is the first standard configuration for a satellite, allowing anywhere from 20 to 50 different experiments to be carried aboard during each mission.

Power to run the experiments is generated by 32,000 solar cells on the paddles. These cells provide 550 watts.

One of the more recent California desert developments, Desert Hot Springs is a rapidly expanding resort community, points out the Automobile Club of Southern California. Partially responsible for its growth, as well as its name, is the abundance of natural hot mineral springs in the area.
